

## Product information

### Amytis Washing Liquid Concentrate

For wool, silk, angora and down  
New size 500 ml

Amytis Washing and Conditioning concentrate is a unique detergent with fiber care benefits for all textiles made from protein/natural fibers (wool, silk, angora, llama hair, mohair, cashmere, and washable down amongst others). It washes in a natural way, conditioning the fabric, conserving the colors and protecting the skin (recommended for hand washing, too). It makes wool spring back into shape, silk soft and other textiles smooth and gentle on the skin. Amytis Washing and Conditioning concentrate has a neutral pH value, does not dry out the skin and does not leave behind any residue that might irritate the skin.

Amytis Washing and Conditioning concentrate is made from egg white extract and vegetable oils, is phosphate free, does not contain bleach, stain remover or added fragrance for the laundry, and is "readily biologically degradable", according to the modified OECD Screening Test. Since Amytis is a product made from natural raw ingredients, it needs preservatives to guarantee shelf life and hygiene. To this end, non-aggressive, formaldehyde free preservatives are used. Amytis is very economical: 1 kg of detergent washes and conditions 125 kg of dry laundry (wool).

Amytis Washing and Conditioning concentrate is available in different original bottles as well as a refill container (all made from polyurethane).

Contents in accordance with EU recommendations:

15-30% Anionic Tenside

< 0,05% Fragrance (Essential Oil)

Phenoxyethanol, Methylparaben, Ethylparaben
