

780642 – 780644 – 780645 AKAblast Spray Powder

AKAblast Spray Powder is used for the safe and gentle dry-cleaning of masonry, sculptures and smaller objects.

Application:

To achieve optimum results, the correct adjustment of the air pressure is mandatory. The ideal air pressure can easily be determined by conducting trials. Generally, the Spray Powder can be re-used several times by recovering the sprayed material. Surfaces to be cleaned must be absolutely dry and must not stain or chalk.

Technical data:

Material:	Specially modified, filled latex foam. Spray powder hard also contains blue PU-Flakes.
pH-Value:	neutral
Storage suitability:	2 years in closed carton
Precautionary measures:	Protection glasses, dust mask recommended.
Waste disposal:	No special disposal measures required. Can be disposed with normal waste.

AKAblast spray powders are available in three different particle sizes:

780642 Spray powder, hard

780644 Spray powder, fine

780645 Spray powder, extra fine

780642 Spray Powder, hard

Application:

Spray powder, hard, is suitable for the cleaning of depressions and hollow spaces in sandstone masonry, sculptures and objects with very rough surfaces.

Note: Spray powder, hard, can be used with Spray Blaster aka 5150 (780650) or other similar devices. This spray powder contains blue PU-flakes which enables the powder to flow free and minimizes the blockages at the nozzle.

780644 Spray Powder, fine

Application:

Spray powder, fine, is suitable for the cleaning of smaller objects, e.g. sculptures, and for the manual cleaning of textiles, e.g. wall carpets.

Note: Spray powder, fine, can be used with Micro Beam Pistol aka 5300 (780655) or other fine spray guns.

780645 Spray Powder, extra fine

Application:

Spray powder, extra fine, is suitable for the cleaning of smaller, sensitive objects, e.g. sculptures, which require a reduced air supply.

Note: Spray powder, extra fine, can be used with Micro Beam Pistol aka 5300 (780655) or other fine spray guns.
